

Does Your Air Conditioner Qualify for SCP Home Thermostat Upgrade?

Get a free smart thermostat – professionally installed in your home.
See if your cooling system qualifies.

WHAT TYPE OF AIR CONDITIONING DO YOU HAVE?

Central air conditioning (A/C)
*Yes, you qualify!**

What it looks like:

Central A/C Vent

Cool air comes through the vents in the ceiling, floor or walls throughout your home

Ductless mini-split
Window air conditioner
Portable air conditioner
None of the above qualify

What it looks like:

Ductless Mini-Split

A thin, long unit high up on your wall
Uses a remote control

What it looks like:

Central A/C Thermostat

A thermostat (or several) on the wall controls the temperature

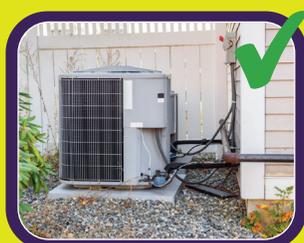

What it looks like:

Window Air Conditioner

Large box in a window opening
May use a remote control

What it looks like:

Central A/C Outside Unit

There's a large unit outside your home (usually a metal box with a fan)

What it looks like:

Portable Air Conditioner

Long tall box that can move around
Connects to the window through a hose
May use a remote control or will have buttons on the unit

*Most central A/C systems are eligible, but some advanced systems may not work with the Google Nest thermostat. Your installer will check your system at your appointment to see if it qualifies.
