

Billing Explanation

1. PG&E Electric Delivery Charges

PG&E's minimum delivery charge. It does NOT include generation charges if you're an SCP customer.

2. Sonoma Clean Power Electric Generation Charges

This is SCP's charge for generation – the cost of producing the electricity you use.

3. Your Net Energy Metering (NEM) Account Summary

This is a summary of PG&E delivery charges and credits to date and does not include your SCP generation charges or credits. This section estimates your Annual True Up with PG&E.

4. Summary of Your NEM Year-To-Date (YTD) Charges

This is a summary of PG&E delivery charges and credits to date, by billing period, and does not include your SCP generation charges or credits.

5. YTD Estimated NEM Charges At True-Up

Your year-to-date NEM Charges represent the balance of your net usage since the start of your True-Up period. Charges are calculated each month but are not billed until the end of the True-Up period.

6. Minimum Delivery Charges

Solar customers are required to pay PG&E a Minimum Delivery Charge. This charge is to ensure that every customer, including those with very little or no energy usage, contributes to the costs of providing electricity service. Your total monthly delivery charges may be higher or lower than the minimum delivery charge.

7. Details of NEM Charges

PG&E delivery charges for your current bill cycle.

8. Generation Credit

This is the amount that PG&E would have charged you for Electric Generation. This number is helpful in comparing SCP's electric generation cost to PG&E's electric generation cost. This charge may be positive, if you over-generated electricity.

9. Power Charge Indifference Adjustment (PCIA)

This fee is required by PG&E of all SCP customers. It is intended to ensure that customers who switch to SCP pay for the above-market cost of energy that PG&E bought on their behalf prior to their switch to SCP. This is charged on net usage only and may be negative if you over generate.

10. Franchise Fee Surcharge

This fee is collected by PG&E to pay for the right to use public streets to run gas and electric service.

11. Details of Sonoma Clean Power Electric Generation Charges

This is a summary of all electric generation charges from SCP. For customers on a Time-of-Use (TOU) rate, each time of use period is broken out to show either net consumption or net generation for that time period.

12. Net Generator Bonus

If your system generated more energy than you used in any given TOU period, you will receive \$0.01/kWh Net Generator Bonus.

13. Credited to NetGreen Balance

SCP credits the full retail CleanStart rate plus a bonus for energy generated. Those credits are banked monthly to be used to offset any SCP generation charges you may have throughout the year.

14. SCP NetGreen Energy Balance

Each spring, SCP will look at the annual amount of energy generated by your system, the annual amount of energy consumed, and then we calculate how much excess energy was exported to the grid, if any, annually. If you have any excess energy exported to the grid, SCP will pay you for that energy at our Premium Net Surplus Compensation Rate (PNSC). If your PNSC credit balance exceeds \$100, SCP will automatically send you a check up to \$5,000. PNSC balances less than \$100 will simply roll over to the next month.*

*By law, NetGreen Aggregation customers are not eligible to receive cash-outs.
