 Sonoma Clean Power
Advanced Energy Center

Power Content Label reflects 2020 verified electric resources for SCP.

This information is required by the California Energy Commission to be mailed to any customer that received service from SCP in 2020 and active SCP customers.

The generation data represents energy procured during 2020 and is provided in the "Annual Report to the California Energy Commission: Power Source Disclosure Program."

A significant portion of SCP's energy comes from clean, large hydroelectric power stations. Under California law, large hydroelectric power stations do not qualify as eligible renewable resources.

Percentages may not total 100% due to rounding.

2020 POWER CONTENT LABEL

Greenhouse Gas Emissions Intensity (lbs CO2e/MWh)			Energy Resources	SCP CleanStart	SCP EverGreen	2020 CA Power Mix
CleanStart	EverGreen	2020 CA Utility Average	Eligible Renewable¹	48.7%	100%	33.1%
80	64	466	Biomass & Biowaste	0.0%	0.0%	2.5%
<p>A bar chart comparing the greenhouse gas emissions intensity of three sources. The y-axis represents lbs CO2e/MWh, ranging from 0 to 1000. The x-axis lists the sources: CleanStart (blue bar, 80), EverGreen (green bar, 64), and 2020 CA Utility Average (red bar, 466). The Utility Average is significantly higher than the other two sources.</p>			Geothermal	14.8%	80.6%	4.9%
			Eligible Hydroelectric	0.0%	0.0%	1.4%
			Solar	9.8%	19.4%	13.2%
			Wind	24.0%	0.0%	11.1%
			Coal	0.0%	0.0%	2.7%
			Large Hydroelectric	44.1%	0.0%	12.2%
			Natural Gas	0.0%	0.0%	37.1%
Nuclear	0.0%	0.0%	9.3%			
Other	0.0%	0.0%	0.2%			
Unspecified Power²	7.2%	0.0%	5.4%			
			TOTAL	100.0%	100.0%	100.0%
Percentage of Retail Sales Covered by Retired Unbundled RECs³:				0%	0%	

¹The eligible renewable percentage above does not reflect RPS compliance, which is determined using a different methodology.

²Unspecified power is electricity that has been purchased through open market transactions and is not traceable to a specific generation source.

³Renewable energy credits (RECs) are tracking instruments issued for renewable generation. Unbundled renewable energy credits (RECs) represent renewable generation that was not delivered to serve retail sales. Unbundled RECs are not reflected in the power mix or GHG emissions intensities above.

0% Financing. 100% Easy.

Installation costs have been going up. To help make the latest, low carbon technologies accessible to all, SCP is offering 0% financing for select energy efficiency technologies—payable through your utility bill! Financing of up to \$10,000 is available for residential customers in Sonoma and Mendocino counties.

Connect & Earn Rewards.

Did you know that you can get a \$5 bill credit every month by connecting your smart thermostat, heat pump water heater, or electric vehicle charger to our GridSavvy Community? When there is excess clean energy on the grid, SCP can enable your participating smart devices to charge, pre-cool, or pre-heat themselves. When there are spikes in demand for electricity, we can slow or delay the devices until the grid is cleaner, avoiding the need for dirty fossil fuels. Together, we can clean up California's energy grid and help prevent rolling blackouts. Visit sonomacleanpower.org/gridsavvy to learn more!

Take your home into the future.

Advanced Energy Center

Sonoma Clean Power's Advanced Energy Center is now open in downtown Santa Rosa! Now more than ever, people want energy-efficient solutions that save money and make them feel good about their choices. That's why we've gathered the latest technology under one roof. We're making clean energy solutions more accessible with 0% financing, deep discounts, and a network of qualified contractors who can bring your project to life.

Contains recycled materials, printed with soy-based ink.
