

Powering everyday moments

Power Content Label reflects 2021 verified electric resources for SCP.

This information is required by the California Energy Commission to be mailed to any customer who received service from SCP in 2021 and/or is an active SCP customer. The generation data represents energy procured during 2021 and is provided in the “Annual Report to the California Energy Commission: Power Source Disclosure Program.”

A significant portion of SCP’s energy comes from clean, large hydroelectric power stations. Under California law, large hydroelectric power stations do not qualify as eligible renewable resources. Percentages may not total 100% due to rounding.

0% Financing. 100% Easy.

Construction costs have been going up. To help make the latest, low-carbon technologies accessible to all, Sonoma Clean Power is offering **0% financing** for select energy efficiency technologies— payable through your utility bill! Financing of up to \$10,000 is available for residential customers in Sonoma and Mendocino counties.

Get started in **5 easy** steps.

- 1 Come meet us and learn more!
- 2 Complete a screening application.
- 3 Select your energy efficient technology and contractor.
- 4 Tell SCP what you want to include in your loan and sign the Participant Agreement.
- 5 Install your technologies and start saving!

For more information, visit us in person at
741 4th Street, Santa Rosa or visit our website
