

Your community owned electricity provider

What is Sonoma Clean Power?

SCP is a not-for-profit public agency who began serving customers in 2014 to give our local communities control over the electricity they use. We provide electricity made from cleaner energy sources with lower emissions to homes, businesses, and city facilities in Sonoma and Mendocino counties.

Is Sonoma Clean Power an extra charge?

No, SCP provides you with electric generation services - the electricity used in your home or business. PG&E delivers the electricity to you through their pre-existing infrastructure.

Contains recycled materials, printed with soy-based ink.

Powering your life with cleaner electricity.

Power Content Label reflects 2022 verified electric resources for SCP.

This information is required by the California Energy Commission to be mailed to any customer who received service from SCP in 2022 and/or is an active SCP customer. The generation data represents energy procured during 2022 and is provided in the "Annual Report to the California Energy Commission: Power Source Disclosure Program".

A significant portion of SCP's energy comes from clean, large hydroelectric power stations. Under California law, large hydroelectric power stations do not qualify as eligible renewable resources.

Percentages may not total 100% due to rounding.

Greenhouse Gas Emissions Intensity (lbs CO ₂ e/MWh)			Energy Resources	CleanStart	EverGreen	2022 CA Power Mix
CleanStart	EverGreen	2022 CA Utility Average	Eligible Renewable¹	50.3%	100.0%	35.8%
112	70	422	Biomass & Biowaste	16.4%	0.0%	2.1%
<p>A bar chart comparing the greenhouse gas emissions intensity of three electricity providers. The y-axis represents intensity in lbs CO₂e/MWh, ranging from 0 to 1000. CleanStart has the lowest intensity at 112, followed by EverGreen at 70, and the 2022 CA Utility Average at 422.</p>			Geothermal	17.0%	86.5%	4.7%
			Eligible Hydroelectric	0.4%	0.0%	1.1%
			Solar	9.0%	13.5%	17.0%
			Wind	7.5%	0.0%	10.8%
			Coal	0.0%	0.0%	2.1%
			Large Hydroelectric	40.0%	0.0%	9.2%
			Natural Gas	0.0%	0.0%	36.4%
			Nuclear	0.9%	0.0%	9.2%
			Other	0.1%	0.0%	0.1%
			Unspecified Power²	8.7%	0.0%	7.1%
			TOTAL	100.0%	100.0%	100.0%
Percentage of Retail Sales Covered by Retired Unbundled RECs³:				0%	0%	
<p>¹The eligible renewable percentage above does not reflect RPS compliance, which is determined using a different methodology. ²Unspecified power is electricity that has been purchased through open market transactions and is not traceable to a specific generation source. ³Renewable energy credits (RECs) are tracking instruments issued for renewable generation. Unbundled renewable energy credits (RECs) represent renewable generation that was not delivered to serve retail sales. Unbundled RECs are not reflected in the power mix or GHG emissions intensities above.</p>
