

**Questions and Answers on SCP's Request for Information for  
EV Charging Installation Services – Preferred Contractor List Selection**

7/10/2025

Respondent 1

1. Aside from the "Attachment A - EVSE Contractor Information Form," what else is needed or required to be submitted?

Only the completed Attachment A form is required for submission.

Respondent 2

2. Will SCP accept an application from a contractor that has only a B license, or must we already hold an active C-10? If a C-10 is required, may we submit while our C-10 addition is still being processed?

An active C-10 Electrical Contractor license issued by the California Contractors State License Board (CSLB) is required; a B license alone does not meet this requirement. You can still apply while your C-10 is pending and submit the full RFI package by 15 July 2025 and include proof that you have filed for the C-10 or that your RME has scheduled or passed the C-10 trade exam.

We will mark your submission “conditional” and automatically change it to “qualified” once the CSLB website shows your C-10 as active. If the license becomes active after we publish the installer list (around 18 July 2025), we will add you later.
